LEE FIELDMAN wallcovering / window graphics / acrylic

DIGITALLY PRINTED wallcoverings

Product LEE FIELDMAN

Description Commercial quality vinyl wallcovering laminated onto woven/non woven fabric backing.

These designs can also be printed onto other Tektura wallcoverings.

Weight 350 grammes per square metre.

Roll Size Lee Fieldman designs are made to order, to fit customer's own wall dimensions. They can

also be scaled, stretched and cropped. Some can be repeated to suit. Each design is supplied in pre-cut drops. The number, width and height of each drop are determined by the final wall dimensions. Drops are supplied with extra selvedge for overlapping and trimming.

Example. 'BOTANIST' design supplied in 5 drops, shown on wall 3m x 5m size.

Maximum recommended size and design repeat

Bloom : 3m tall x 1.97m wide. Can be repeated horizontally. **Botanist :** 3m tall x 1.55m wide. Can be repeated horizontally

Wildwood: 3m tall x 5m wide.

All designs can be rescaled, stretched or cropped to fit. (Extent of scaling and stretching depends on wall dimensions). Print size exceeding recommended maximum may result in

some deterioration in print quality (eg pixelation)

Colour Lee Fieldman designs are offered in standard colours. (see tektura.com for full colour

range). They cannot be custom coloured.

Fire Rating Euro classification B when adhered to suitable substrate.

Adhesive Generally Tekfix Plus, though depends on substrate.

HangingDigital wallcovering is printed to order, and each order is unique. Selvedge allowance and sequence in which drops should be installed are given in hanging instructions supplied with

order. Exact pattern matching is vital. The product should not be reverse hung.

Apply adhesive to wall surface. Carefully smooth wallcovering onto wall surface using a felt roller or felt-covered spatula. Note that allowance will have been made for trimming top and bottom to compensate for uneven walls. Overlap lengths and visually match image. (In many cases crop marks are also included at the top/bottom of each drop as an additional guide to pattern matching). Adjust position if necessary to achieve optimum pattern match. Double cut through using a sharp blade, cutting perpendicular to wall surface to ensure a clean join. Use a seam roller to ensure product is well bonded at the

join. Remove any adhesive seepage immediately with warm water.

Maintenance Digital vinyls with fabric backing are wipeable and washable, and offer some resistance to

knocks. With regular cleaning they will retain their original appearance for many years

depending on area of use.

Always carry out a trial in an inconspicuous area first, to ensure cleaning agent suitable. Avoid polishes, abrasive cleaners, solvent or bleach-based cleaners as these will damage the print and vinyl. Slight or moderate soiling can be removed using a combination of mild non-soapy detergent and a soft damp cloth/sponge. Dabbing – certainly not rubbing – is recommended to lift the soil.

It is important to rinse off with clean water and (absorbent) cloth, always cleaning from the skirting level upwards. Individual stains should be removed as quickly as possible. This wallcovering contains antimicrobials which guard against mildew and bacterial growth

Health & Safety This product is classified as non-hazardous and therefore does not require any special

handling. This product does not require special labelling.

Handling/Storage Store at ambient temperatures away from heat source. Suitable lifting equipment may be

required.

Fire Fighting Any extinguishing media are suitable. Wear self contained breathing apparatus, protective

clothing and full face mask. Fumes should be ventilated immediately due to possible

liberation of noxious gases.

Ecological This product is not bio-degradable. Dispose of in accordance with Local Authority

regulations or via an authorised contractor.

DIGITALLY PRINTED window film

Description 70 micron polymeric film, frosted or clear.

Weight 22 grammes per square metre

Size Varies, depending on project

Fire Rating Euroclass B

Adhesive Product is self adhesive - permanent pressure sensitive acrylic with Kraft release liner

Installation Apply the film using a wet application method to saturate the glass, using either

proprietary application fluid or a solution of water with a drop of washing up liquid added. Align the film at the top edge using the 'hinge' method. Squeegee the film by applying overlapping strokes from the top centre outwards in each direction and then repeat down the film. A felt squeegee is recommended to avoid scratching. Avoid creasing the film. Once applied the film can be trimmed with a sharp blade. Be aware that water around the edge of the panel will cause dirt ingress, so avoid excess fluid towards the edges of the

film.

Maintenance The film is wipeable and washable. With occasional cleaning it will retain its original

appearance for many years depending on area of use. Always carry out a trial in an inconspicuous area first, to ensure cleaning agent suitable. Clean with a mild non-soapy detergent with a soft cloth or sponge. Excess water can be carefully removed with a soft rubber squeegee. Be aware that any grit or rough edges on the squeegee may cause

scratching.

Health & Safety This product is classified as non-hazardous and therefore does not require any special

handling. This product does not require special labelling.

Handling/Storage Store at ambient temperatures away from heat source. Suitable lifting equipment may be

required.

Fire Fighting Any extinguishing media are suitable. Wear self contained breathing apparatus, protective

clothing and full face mask. Fumes should be ventilated immediately due to possible

liberation of noxious gases.

Ecological This product is not bio-degradable. Dispose of in accordance with Local Authority

regulations or via an authorised contractor.

DIGITALLY PRINTED Zintra Acoustic panels

Description Zintra Acoustic 12mm panel / 100% recyclable polyester / matte finish. Made with 60%

recycled post consumer PET.

Weight 2.4kg per square metre.

Size Each mural is supplied in pre-cut panels. The number, width and height of each

panel are determined by the final wall dimensions. Max single panel size 2790mm x 1215mm x 12mm

Fire Rating Euroclass B

Installation Adhere to substrate with silicone-based construction adhesive.

Alternatively attach with screws, Z-clips, nails, stand-offs, aluminium trim or millwork.

Maintenance Vacuum to remove dust. Remove spills immediately using a clean damp cloth or with soap

and water. Carpet and fabric cleaners can be used but always test an inconspicuous area

first.

Health & Safety This product is classified as non-hazardous and therefore does not require any special

handling. This product does not require special labelling.

Handling/Storage Zintra acoustic panels must be stored in a cool, dry, well ventilated area, out of direct

sunlight and away from heat sources. During storage keep covered (eg with polythene sheet) at all times. Panels should be stored horizontally.

Pallets should not be stacked.

Fire Fighting Any extinguishing media are suitable. Wear self contained breathing apparatus, protective

clothing and full face mask. Fumes should be ventilated immediately due to possible

liberation of noxious gases.

Ecological This product is not bio-degradable. Dispose of in accordance with Local Authority

regulations or via an authorised contractor.

DIGITALLY PRINTED Acrylic

Description 5mm thick cast acrylic, backprinted. The acrylic is clear, with a glossy or antiglare(matt)

surface. Supplied with flame-polished edges.

Weight 595 grammes per square metre, based on 5mm thick acrylic.

Panel size Varies, depending on project. Max recommended size 2400mm x 1200mm

Fire Rating Class 3 to BS476 part 7

Installation Panels are supplied ready-drilled, with satin silver mount fixings. Used in conjunction with

fittings supplied, the panels are designed to sit 18mm proud of the wall surface.

Maintenance Acrylic panels can be cleaned by washing with a solution of lukewarm water with a drop of

washing up liquid, using a soft cloth / chamois leather to loosen any dirt and grime. Then, rinse with cold water and dry with a very soft cloth / chamois leather to prevent water

spotting, and help prevent static.

Do not use chemicals, glass spray, or other abrasive cleaning materials. Do not use any form of scraper of squeegee or other sharp instruments.

Health & Safety No classifiable hazardous ingredients.

Handling/Storage Large panels can be heavy and unwieldy. Handle with care. If broken or chipped, the

resultant edges can be sharp and cause cuts to skin and eyes. Wear suitable gloves. Take

precautionary measures against static discharges.

Store below 40°C and away from heat source. Store vertically on A frames (larger panels).

Suitable lifting equipment may be required

Fire Fighting Water spray, foam, dry powder or CO2. Wear self contained breathing apparatus,

protective clothing and full face mask. Fumes should be ventilated immediately due to

possible liberation of toxic, irritant and flammable vapours.

Ecological This product is not bio-degradable. Dispose of in accordance with Local Authority

regulations or via an authorised contractor.
